

We can help. Together. Today.

Nepal's earthquake this past spring destroyed or damaged nearly 900,000 dwellings. With winter coming soon, we need to get families back into real houses, not tents or makeshift shelters.

More than eight million people – one-fourth of Nepal's population – were affected by the earthquake there. UCC Disaster Ministries has set a goal of building 50 earthquake resistant homes for families who have lost everything. For every family we're able to get back into a safe, sustainable home, the better they'll be able to support their local community.

UCC Disaster Ministries has provided \$140,000 for immediate response efforts and long-term recovery and reconstruction. "Long-term recovery and rehabilitation work are often the most expensive and least funded," says UCC Disaster Ministries Executive Zach Wolgemuth. "The UCC is preparing for a long recovery and continued engagement in the relief effort, ready to fill the gaps where needed."

More information about the UCC's efforts and how you can help can be found on the website: ucc.org/disaster_nepal_earthquake. You can also return the form below. Thank you!

United Church of Christ

An earthquake resistant home costs approximately \$4,000. Your donation for a full house, 1/10th, or 1/100th of a house will help. Please fill in and return this form along with your donation today.

We're in! ☐ \$40 (1/100 house) ☐ \$400 (1/10 house) ☐ \$4,000 (full house)

name _____ address _____ city _____ state _____ zip _____
