

PROGRAMS OF GROWTH

Following a Fitness Review, a Committee on Ministry may determine that a program of growth is necessary to create the conditions under which an individual with standing may have their fitness for ministry and standing reaffirmed. A program of growth is required when the outcome of a Fitness Review is Conditional Affirmation, Censure, or Suspension.

Fitness Reviews as a whole are exceedingly vulnerable experiences, and ministers as well as Committee on Ministry (COM) members should acknowledge this at every stage of the process. It is difficult to realize that while one does many things well in ministry, one has also done something inappropriate or wrong in ways that have caused harm to others. There is a strong temptation to go into damage control mode, to deny or minimize the misconduct, to rationalize or compartmentalize the behavior, to feel angry or attacked. If the minister can get past this, there is a corollary temptation for the minister to move into self-pity or helplessness, believing that all the good they have done is a sham.¹ The Committee on Ministry's role is to determine how best to create the conditions by which a program of growth can help the minister to integrate the destructive behavior that gave rise to the Fitness Review into their self-understanding as a gifted but imperfect minister and servant of God.

The Committee on Ministry asks: what changes need to be demonstrated by the person to the Committee before they can be reaffirmed for ministry in and on behalf of the United Church of Christ? Are there other actions that need to be taken by the minister (written apology, repayment of financial debt, etc.) before their standing can be reaffirmed? What timeline is anticipated for assessing the program of growth? What tools, resources, or contacts will enable the minister to achieve the growth necessary to faithfully and effectively minister in and on behalf of the United Church of Christ?

A comprehensive growth plan takes into account the circumstances that gave rise to the misconduct and the impact the minister's behavior has had on others, the findings of the Committee on Ministry, the response of the minister to the concerns being raised, the capacity of the minister to understand their behavior and their

willingness to change, and the support systems surrounding the minister. It provides an opportunity for a minister to gain greater self-knowledge about their vulnerabilities, take responsibility for their actions, and develop strategies to prevent future similar actions.

The purpose of the program of growth is to give the minister the tools to enable them to commit to healthy and effective ministry, and to facilitate their willingness to use those tools. Therefore, an effective program of growth includes specific benchmarks and goals for the minister to achieve. These benchmarks and goals should:

- be specific to the concerns that were raised in the Fitness Review;
- include periodic check-ins with the Committee on Ministry or Conference staff as specific points;
- provide an attempt at healing for victims of misconduct when possible; and
- encompass the hope of fullness of life for the authorized minister.

A program of growth includes SMART goals: Specific, Measurable, Attainable, Relevant, and Timely. This means that the minister has a clear, accountable, and realistic pathway towards restoration, affirmation of fitness, and reinstatement of standing for ministry in and on behalf of the United Church of Christ. A program of growth is typically between six months and two years in length. A Committee on Ministry is empowered to lengthen the period of time for the program of growth if the minister continues to make progress towards their goals.

All ministers undergoing a program of growth will benefit from a psychological assessment from an accredited agency or Ministry Development Center, with results released to the United Church of Christ and sent to the appropriate Association or Conference office. The staff performing the assessment should be made aware of the concerns raised in the Fitness Review, be given a summary of findings from the interviews conducted by the Interview Team, and know the outcome of the Fitness Review as discerned by the COM. The results of this psychological assessment will help the COM develop the rest of a comprehensive growth plan.

The most effective programs of growth build education, practice, and reflection into a holistic plan, and are supported by therapeutic practice and/or spiritual direction to identify healthy practices for all areas of the minister's life, combining "inner intentions and

external support structures.”² The Committee on Ministry might choose relevant parts of the UCC Ministerial Code and/or Marks of Faithful and Effective Ministers, ask the minister to reflect on them in relation to the fitness concern that was raised, and require the minister to work with a mentor, therapist, and/or spiritual director to develop healthier practices. The following pages include some additional samples of the kind of SMART goals that may be appropriate for some programs of growth, along with some actions that provide more specificity, guidance, and clarity for the minister and for the Committee on Ministry:

The Committee on Ministry is responsible for regularly assessing the progress of the minister’s growth plan. At minimum, a COM can expect to be in touch with a minister monthly for the first few months of the growth plan, followed by quarterly until its completion. At the conclusion of the growth plan, the Committee on Ministry determines whether to reaffirm the minister’s fitness for ministry, extend the period of time of the growth plan, or terminate the minister’s standing. A minister’s failure to demonstrate progress with the program of growth (either because they are unwilling or unable to do so) are grounds for suspension or termination of ministerial standing.
